191 Fayette Street, Martinsville, VA 24112
276-403-5671

GWO Basic Technical Training (BTT) provides candidates with the knowledge and skills to carry out various installation tasks and includes modules for Hydraulic, Mechanical and Electrical.

Participants will be able to perform basic hydraulic, mechanical, electrical and installation tasks under the supervision of an experienced technician.

Upon completion of the GWO Basic Technical Training (BTT) modules, candidates will possess an awareness of the hazards encountered when working on hydraulic, mechanical, electrical and installations systems and how to control and mitigate these hazards, preparing candidates for working both on and off shore in the wind power industry.
